About North American Hardwoods

Wood Choices and Finish Options

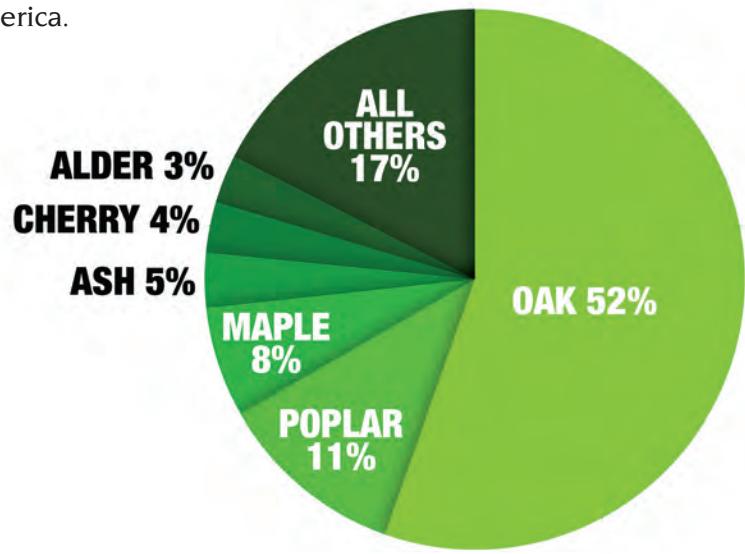

About North American Hardwoods

Hardwoods, also known as deciduous trees, usually produce a fruit or a nut and lose their broad leaves every Fall.

Oak species are the most common, representing more than 50% of all hardwood trees in North America.

Naturally occurring variations in hardwoods

Wood species like Maple and Cherry, with its beautiful grain patterns and rich coloring, are some of the most desirable wood species for furniture. Variations in individual planks, like tiny knots, pits, mineral streaks and deposits, enhance the natural beauty of handcrafted cherry wood furniture and make each piece unique.

White Edging Explained

When examining your furniture, you may notice lighter edges on the edges of drawer fronts and face frames, especially when dark stains are used, and when the edge is sharp, as opposed to a rounder edge. We utilize high-quality stains to achieve the perfect finish, and several factors can contribute to this lighter edging effect.

The precise and sharp edges of the drawer fronts and face frame naturally tend to hold less stain, resulting in a lighter appearance along those edges. This characteristic is completely normal and expected in handcrafted furniture, adding to the unique charm and character of each piece.

Rest assured, this lighter edging is a hallmark of the meticulous craftsmanship that goes into every item we create, reflecting the quality and attention to detail that Daniel's Amish Collections is known for.

Our Green Story

The Amish have always been green!

The Amish lifestyle is one of the “greenest way of life” stories in the world. They have always lived off the land and know how important it is to responsibly farm their land with crop rotation, and in the case of trees, how to properly timber and replant a forest where it will never run out. From their use of horse and buggies as transportation, to their local gardens for fruits and vegetables, wood warmed homes, and their embracement of solar panels to capture energy to run their households, the Amish way of life is one of the greenest in this great nation.

The Daniels Amish Environmental Story

The biggest part of our story is twofold. First, we use one of the only renewable resources in the world – wood; and second, we have a much smaller “total environmental footprint” than foreign competitors. You will see that because we are Made in the USA – we don’t ship products across the ocean, using fuel, emissions, etc. – and have a much smaller environmental footprint. It’s kind of the equivalent of driving to a local farm to get fresh eggs – vs. using Amazon to deliver eggs that are from California. They are both eggs, but one of them took a lot more waste, energy, and packaging to get to your house.

Our Commitment to Renewable Resources

Above all, Daniel's Amish is committed to using renewable resources, and did you know that wood is one of the biggest renewable resources in the world? In fact, America now has almost three times the amount of trees it had in 1953! That's right – as a result of decades of excellent management by the US forest products industry, along with the federal and state regulations that are among the strictest in the world - our trees have nearly tripled in the past 75 years. And they're still growing! Currently US hardwood forests are now growing twice as fast as they are being cut. It's a fact – no other hardwood forests in the world are managed as well, offer as wide a variety, and sustainably provide as much volume as the United States. Please see the attached articles that detail how America's forests are flourishing – and that we actually have more trees today than we did 100 years ago! Please check out the attached article showing how **In America over 6 trees are planted for every tree that is cut down!** That is a truly amazing statistic!

Not only do trees absorb carbon dioxide and produce oxygen, but they also keep the surface of the planet cool, they hold soil together so it can stay rich, and they provide the habitat that animals, insects, birds, and other plants call home, not to mention they support many people's livelihood. So, remember to “Buy American”, “Buy Wood” and sleep easier knowing you are doing the right thing. By purchasing real wood products and not fabricated plastics, or other materials that are not renewable, and ultimately take lots of chemicals and energy to make, your fine piece of wood furniture will last for a long time, and you will have the comfort of knowing that it is truly environmentally friendly.

Just say “no” to...

1. Inexpensive trendy designs – Many of these products from “fast furniture” companies aren’t built to last, and promote rampant furniture buying, contributing to deforestation, and burgeoning landfills.
2. Foreign Made Furniture – Foreign made furniture usually has a much higher environmental footprint than American made furniture. Many Asian manufacturers buy wood from the USA, ship it to Asia, transport it to the factory in Asia, build the product, then transport the finished product back to the port, where it gets shipped back to the USA, to arrive in the USA at a port, and then shipped to the store. Even for foreign manufacturers who use their own local wood – that furniture still must be transported thousands of miles to the USA – leaving a huge environmental footprint of gas, packaging, fuel, emissions, and chemicals.

Compare that to Daniel's Amish furniture, where we source most of our raw materials here in the USA. At Daniel's Amish, we make the furniture here in Ohio, and then truck it a few hundred miles to the store, leaving a much smaller environmental footprint than literally shipping it from halfway across the world. Plus, all the money going to the workers who build our furniture stays right here in America.

A Note on our Packaging and Being Green

We are constantly striving to keep our environmental footprint as small and green as possible. We also understand that it takes a lot of work to package furniture, so that it arrives at its destination in perfect shape. So, in order to keep our footprint as small as possible, many of our packing supplies are made from recycled materials AND we encourage our customers to recycle it again by dropping it off at their local recycling center. Using recycled materials costs us more, but we feel it is worth it.

Our Recycling Initiative

At Daniels Amish we make every effort to recycle and be responsible to the environment. Our sawdust is used at local Amish farms for animal bedding and much of our wood scraps are used by the community to power wood stoves in Amish households. To sum it up, Daniel's Amish is a very environmentally responsible company that you can feel good about buying and enjoying for years to come.

Fare thee well!

Daniel's Amish Collection

Important notes from Daniel's Amish® Collection

Four Wood Species

- All dining furniture is available in Oak, Cherry, Maple and Quartersawn White Oak.
- Distressed finishes are available in Cherry and Maple.
- Pricing step ups for Tables and Casegoods are Oak, Cherry/Maple, QS White Oak.
- Pricing step ups for Chairs are Oak, Maple, Cherry and QS White Oak.

Wood Finishes

- Wood species are available only with the specific stains shown in the catalog and in the design center.
- NOTE: A stain from one wood species may NOT be used on a different wood species.
- Once the wood species is selected, the price remains the same for each of the stains for that specific wood species.
- Premium painted finishes are available ONLY on Maple or Oak with a 10% UPCHARGE.
- Painted finishes are NOT available on table tops.
- Standard painted finishes are available at no additional upcharge.

Tables

- Leg tables can be ordered as solid tops and with up to 12 leaves. Leg tables ordered with leaves utilize a sturdy all-wood slide and can self-store up to 4 leaves as specified on each table page. A 5th leg center support is included on all tables 72" in length (before leaves are added) and on shorter tables when 3 or more leaves are specified. A 6th leg center support is provided when 8 or more leaves are ordered.
- Pedestal tables are constructed with single or, when required based on shape and length, double geared slides. They are designed to hold up to 4 leaves.
- All Not Self-Storing leaves will come with aprons.
- Some leaves are provided without aprons for self-storing purposes as noted in the table description. Aprons can be added to these leaves at no charge, but this will affect number of leaves that can be self-stored. Please specify the addition of aprons when ordering.
- Table locks are installed when there is sufficient space between the aprons and slides as determined by table size and shape. Please refer to the Table Lock Guide to determine whether locks are installed on a specific table.
- Custom widths may be special ordered, provided they are wider than 36". The price is determined by the next wider standard size available as shown in the price list.
- The bottoms of all tables are sprayed with a wood stabilizer to help prevent cracking and warping.
- Table tops and leaves are carefully selected for best wood grain and color match. However, variation in hard woods is expected and contributes to the natural beauty. Lighter stains will show greater variation, including mineral streaks and deposits, small knots, and tiny pitting, all of which are normal and expected.
- Tables should be kept in a humidity range between 35° - 45° to help prevent cracking and warping. Do not place tables close to a heat source or outlet.
- Leaves are carefully hand-fitted during production. Additional leaves cannot be ordered once the table is produced.

Two-Tone Program

There is no upcharge for two-tone stains on dining furniture from Daniel's Amish®. We are confident that you and your customers will take full advantage of this opportunity to create beautiful and unique dining room furnishings.

Please note carefully the following details:

- 1 All tables may be ordered with two different stains, one for the top and the other for the base, at no additional cost, provided the wood species are priced the same.
- 2 All chairs currently available in two-tone (as noted in the catalog on both the color and pricing pages) may be ordered with two different stains, one for the seat and the other for the frame, at no additional cost, provided the wood species are priced the same.
- 3 All case pieces, hutches, buffets, and sideboards can be ordered with two different stains, at no additional cost, provided the wood species are priced the same. Doors, drawer fronts, and tops will be finished in one stain while the frame will be finished in the second stain as specified. With the exception of the Classic Buffet. The top will be in one stain and the frames, drawers and drawer fronts will be in another stain unless specified.
- 4 Two-tone combinations specifying both distressed and non-distressed STAINS are NOT available. Distressed pieces CAN be ordered with Premium painted Maple or Oak bases and frames for a 10% upcharge. See Distressed section for additional details.
- 5 Tables, chairs, and case pieces ordered with two different wood species in order to specify a particular stain combination will be charged at the cost of the more expensive wood when there is a difference. When ordering chairs or case pieces, please specify the higher priced wood species when there is a difference since this determines the price. Please see example below.
- 6 Chairs ordered with a fabric, vinyl, or leather seat cannot be ordered in two-tone. Standard upcharges for upholstery will apply.
- 7 There is still a 10% upcharge for Premium painted Maple and Oak finishes. Please see example below.

Examples:

Use of two different wood species: When you order a two-tone product in dining, the cost will need to reflect the higher wood price. As an example, if you order a Maple and QS White Oak combination, you would use the QS White Oak price. If you order a Maple and Cherry combination and the cherry price is listed higher in the pricing column, you would use the higher priced wood. There is no upcharge for using two-different stain combinations.

Premium Painted tables and chairs: A customer wants to order a Cherry table with a stained top and Premium painted base and Cherry chairs with stained seats and painted frames. The higher price of the two wood species should be used which in this case is Cherry. To determine the price, add a 10% upcharge to the standard price for these items in Cherry. When ordering chairs and case pieces, please specify the higher priced wood species when ordering since this determines the price.

Standard Painted Maple tables and Chairs: Can be ordered in any combination at no additional upcharge.

danielsamish.com

Dining Distressed Program

All tables, benches, stools, and case pieces and nearly all chairs can be ordered distressed on carefully selected finishes in Cherry and Maple for a modest upcharge. Compared to the previous Rustic program, this provides far more choices and much better value for customers.

Please note that these instructions MUST be closely followed when ordering distressed tables and chairs. **Distressed dining pieces are available only with specific stains on Distressed Cherry (31) and Distressed Maple (41) as shown in the catalog or with painted Maple or Oak two-tone combinations as shown below. Only the Hand Hewn (E6) and Hand Worn (E7) edge treatments are available.**

Program Details - Selection and Pricing

- 1 Select ANY table with 4 leaves or less, find the price for Cherry & Maple, and add the upcharge shown at the bottom of the price page to determine the distressed price. After the 4th leaf, please add the upcharge shown at the bottom of the page for each additional leaf.
- 2 Select any chair or any barstool, find the price in Maple or Cherry, and add the upcharge shown at the bottom of the price page.
- 3 Select any bench, including extendable versions, find the price in Cherry & Maple, and add the upcharge shown at the bottom of the price page.
- 4 Select any hutch, find the price in Cherry & Maple, and add the upcharge shown at the bottom of the price page to determine the distressed price.
- 5 Select any buffet or sideboard, find the price in Cherry & Maple, and add the upcharge shown at the bottom of the page to determine the distressed price.
- 6 Select any combination hutch and buffet (corner unit), find the price in Cherry & Maple, and add the upcharge shown to determine the distressed price.

Special Notes

- **Tables.** Many of the tables in the Daniel's Amish dining table catalog can be ordered distressed. Please consult the Tables section for choices.
- **Chairs, Benches, Barstools.** Many of the chairs in the Daniel's Amish dining chair catalog can be ordered distressed. Please consult the Chairs section for choices.
- **Case Pieces.** Many of the hutches, buffets, sideboards, servers & wine cabinets in the AM dining hutches, buffets, sideboards, servers & wine cabinets catalog can be ordered distressed. Please consult the catalog section for choices.
- **Edge Profile.** Distressed table edges and chair seats and frames receive either the more heavily distressed hand hewn (E6), or less distressed hand worn (E7), edge treatment as ordered. No other edge profiles can be ordered on distressed items.
- **Wood Species.** Distressed dining furniture is offered only in Distressed Cherry (31) and Distressed Maple (41) or with painted Maple or Oak two-tone combinations as specified below. Non-distressed finishes on other wood species are NOT available.
- **Finishes.** Distressed finish codes have changed and now include either H (Hand Hewn) or W (Hand Worn) to specify the edge treatment. Finish codes must include H or W to ensure order accuracy.
- **Two-tone combinations.** When you order a two-tone product in dining, the cost will need to reflect the higher wood price. As an example, if you order a Maple and QS White Oak combination, you would use the QS White Oak price. If you order a Maple and Cherry combination and the cherry price is listed higher in the pricing column, you would use the higher priced wood. There is no upcharge for using two-different stain combinations. See the two-tone section on the previous page for additional detail.
- **Two-tone distressed combinations with painted bases and frames.** Two-tone combinations specifying distressed finishes and painted bases or frames are available. Table tops, chair seats, bench tops, and case piece doors, drawer fronts, and tops must be in an available distressed finish. Table bases and legs, chair frames, bench legs, and case piece frames must be in an available painted Maple or painted Oak finish and will NOT be distressed. A 10% upcharge will be added to the distressed price for each piece when ordering premium paint.

Premium Paint vs. Standard Paint: A Comparison

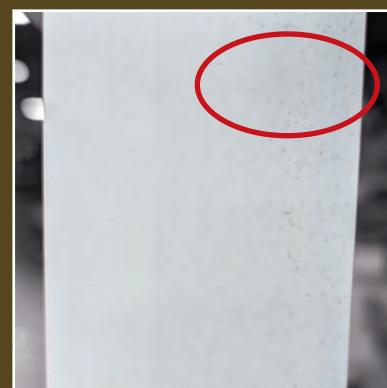

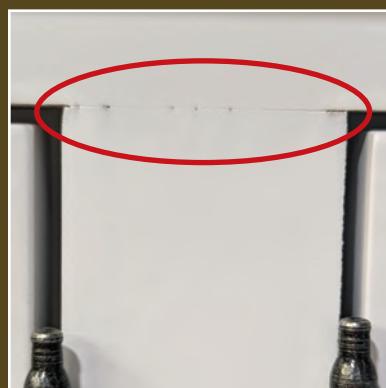

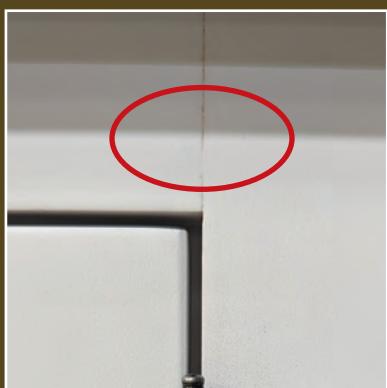

Daniel's Amish has two different levels of paint. The first one and most popular choice is our Premium paints. These paints take a few additional steps to apply to our furniture resulting in a piece of furniture that hides any blemishes in the wood as well as covering all joints and small imperfections. There is a 10% upcharge for these paints because of the cost of the extra applications.

Our second level of paint is called Standard Paint. We use the same paint but there is only one coat of paint applied. The color is not as pure and may show mineral deposits, wood grain, and natural imperfections in the wood that an extra coat would normally conceal. This is ideal for two-toning or dining tables and chairs.

Standard Paint:

- Typically applied in fewer steps, covering the surface but may not fully conceal imperfections
- May reveal some natural flaws in the wood such as dents, sap, and wood grain
- May not cover all joints consistently
- Finish may vary slightly in texture and consistency
- No upcharge
- A more budget-friendly option suitable for those prioritizing cost

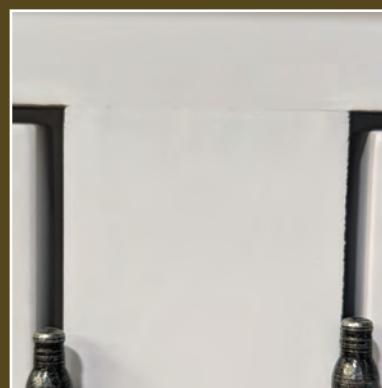

**Choose Premium Paint for a higher gloss finish
that transforms your furniture into a work of art.
Opt for Standard Paint for a cost-effective option
that still delivers quality coverage with
a touch of natural character.**

Premium Paint:

- Multi-step process covering the entire piece of furniture
- Offers consistent coverage, hiding natural imperfections like dents, sap, mineral deposits, and wood grain
- Results in a glossy consistency
- Ideal for those seeking a pristine, high-end look for their furniture
- Upcharge

It's easy to choose your Daniel's Amish® furniture!

Step One: Choose Your Table Size

Using the Daniel's Amish® Product catalog, choose your table top from hundreds of table sizes.

Step Two: Choose Your Table Base & Edge Style

Using the in-store display (or our product catalog), choose the table base style (legs or pedestal) and table edge that you like. Daniel's Amish® offers several leg styles, pedestal styles and edge styles to suit your tastes.

Step Three: Choose your Wood and Finish

Using our 12" x 12" solid wood samples found on the in-store display (or our product catalog) simply choose the species of wood and finish you prefer. Daniel's Amish® offers more than 50 finishes on four species of wood.

Step Four: Enjoy Your Furniture!

That's it! All you need to do now is sit back and enjoy your custom furniture. And you'll sleep easier knowing that your Daniel's Amish® furniture was constructed with the finest materials available – all by Amish craftsmen. It's also nice to know that all Daniel's Amish® furniture has been — and always will be — handcrafted in the USA — for generations past and generations to come.

Daniel's Amish Collection®

Care and Maintenance of Catalyzed Varnish Finish

Catalyzed Varnish is the most commonly used finish in the high-end furniture market. When properly applied and cared for, the beauty of your furniture's finish will last for generations. To maintain the beautiful appearance, a few care guidelines must be followed.

- Catalyzed Varnish has excellent resistance to foods, beverages and common household chemicals. This finish offers you a very hard, mar-resistant surface, but like any finish may still be scratched or damaged if not cared for properly.
- Your new finish does not achieve its maximum performance properties for at least 30 days from the time it was applied. This is based on maintaining a temperature of at least 70 degrees.
- Dyes and inks may discolor the finish. The ink and dyes from newsprint and plastic bags may penetrate into the finish when moist.

1 Placement

Do not set your table in front of radiators, heating vents or heating stoves as dry air can cause wood to dry out which can cause warping or cracking.

2 Humidity

Table should be placed in a controlled environment with an indoor humidity range of 35 - 45%. If the humidity is not kept within this range, the table can expand or contract causing a split in the grain pattern or joints of the panels. Seasonal gapping or minor cracks in the grain pattern are considered normal and are not considered a defect of materials or craftsmanship.

3 Care and Cleaning

Conversion Varnish top coat requires minimal care and cleaning. We recommend periodic cleaning with a mild detergent like Dawn and water solution to remove dirt, dust and grease that buildup with routine use. Dampen a soft non-abrasive cloth and wipe the entire exterior surface of the furniture. Dry with a soft cloth. Never use a wet cloth that allows water to run down the furniture and always dry the furniture immediately if water is spilled onto the surface.

Care should be taken not to use abrasive cleaners, ammonia, or any other type of harsh chemical. These cleaning agents may cause discoloration, scratching, marring and dulling of the finish. We also discourage the use of furniture polishes and waxes as they may leave a film on the surface that attracts dust and dirt. These polishes may also cause an irregular or blotchy appearance because they are unable to stand up to many common stains.

4 Leaf Storage

Store your leaves in or close to the table or in a like environment. Avoid storing them on end. Do not store in a damp basement or dry attic.

Chemical Resistance Tests

Below are the results of subjecting our finish to the most common household chemicals:

Household Chemical	Hours	Result
Water	24	No Effect
Coffee	24	No Effect
Ketchup	24	No Effect
Vinegar	24	No Effect
Lemon Juice	24	No Effect
Ethanol/Water	24	No Effect
Grape Juice	24	No Effect
Orange Juice	24	No Effect
Olive Oil	24	No Effect
Detergent	24	No Effect
Mustard	1	No Effect
MEK	(100 double rubs)	No Effect
Acetone	(2 minutes)	No Effect

Caring for your Daniel's Amish® furniture!

Humidity:

Excessively dry or damp air causes natural wood to expand and contract. Keep your home's humidity between 35 - 45% to prevent cracking and warping.

Ultraviolet rays:

Ultraviolet rays from direct sunlight or fluorescent light fixtures can cause chemical changes in the wood and finish. Move your table or draw the curtains.

Chemical cleaners:

Commercial waxes, polishes, or other cleaners can damage the finish of your new hardwood table. A damp cloth is all you need to use.

Heat:

Radiators, wood stoves, heating ducts – they warm your home, but dry out your solid wood table. Protect your investment by placing your table away from the heat.

Chemical Resistance Tests

Below are the results of subjecting our finish to the most common household chemicals:

Household Chemical	Hours	Result
Water	24	No Effect
Coffee	24	No Effect
Ketchup	24	No Effect
Vinegar	24	No Effect
Lemon Juice	24	No Effect
Ethanol/Water	24	No Effect
Grape Juice	24	No Effect
Orange Juice	24	No Effect
Olive Oil	24	No Effect

About Revolution Performance Fabrics

Proudly made in America

revolution
PERFORMANCE FABRICS

- Inherently stain resistant with no chemical treatment, no PFCs
- Cleanable with ordinary household cleaners, even diluted bleach
- Superior durability and light fastness
- Made with Olefin, an UPCYCLED fiber
- Smallest carbon footprint of any fiber (Source: Higg Index)
- Made in America

Zero PFC Chemicals

Revolution Fabrics does NOT use any PFC Chemicals in our manufacturing process. Revolution fabric is safe for family, friends and pets to live on.

Stain Resistant

Revolution Fabrics are made of Polypropylene and are inherently stain resistant. Further, Revolution is durable, beautiful and a great value.

Made in America!

Revolution is also entirely made in the United States in Kings Mountain, North Carolina.

Upcycled... Greener Than Natural Fibers

Upcycling is the process of transforming byproducts, waste, and other trash into new and useful materials. Olefin is the only upcycled fiber available for making upholstery fabric.

Olefin is a byproduct of the refining industry. For many years, it was discarded. The Nobel Prize for Chemistry was won by the scientists who discovered a use for this unique polymer that eliminates waste.

Natural fibers like cotton, linen, and wool require lots of the earth's most precious resources... water and land, which are used in large amounts in the production and dyeing of natural fibers. Olefin is dyed without the use of water and requires almost no land and water for its production.

Because it is produced from what was formerly waste, Olefin has by far the smallest carbon footprint of any upholstery fiber. (Source: Higg Index)

Stain Resistant for Life

Olefin is a unique, solution-dyed fabric because it has no 'dye sites', so stains are not able to attach themselves to the fiber, making the fabric inherently cleanable. Other solution-dyed fabrics such as acrylic, Polyester and nylon do not have this property so they must be treated with stain resistant chemicals, which wear off over time.

100% Made in America

STI, the makers of Revolution, is a family-owned factory that has been making upholstery fabric in Kings Mountain, North Carolina since 1964. All Revolution yarns are also made in America.

Easy to Clean

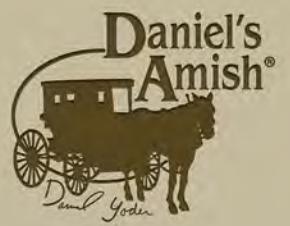

Revolution fabrics can be cleaned with any household cleaner, even bleach!

Resists Fading in Sunlight

Revolution indoor fabrics are highly resistant to sunlight.

Caring for your Daniel's Amish® furniture!

Humidity:

Excessively dry or damp air causes natural wood to expand and contract. Keep your home's humidity between 35 - 45% to prevent cracking and warping.

Ultraviolet rays:

Ultraviolet rays from direct sunlight or fluorescent light fixtures can cause chemical changes in the wood and finish. Move your table or draw the curtains.

Chemical cleaners:

Commercial waxes, polishes, or other cleaners can damage the finish of your new hardwood table. A damp cloth is all you need to use.

Heat:

Radiators, wood stoves, heating ducts – they warm your home, but dry out your solid wood table. Protect your investment by placing your table away from the heat.

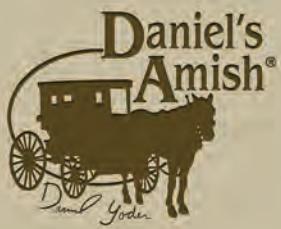

Chemical Resistance Tests

Below are the results of subjecting our finish to the most common household chemicals:

Household Chemical	Hours	Result
Water	24	No Effect
Coffee	24	No Effect
Ketchup	24	No Effect
Vinegar	24	No Effect
Lemon Juice	24	No Effect
Ethanol/Water	24	No Effect
Grape Juice	24	No Effect
Orange Juice	24	No Effect
Olive Oil	24	No Effect
Detergent	24	No Effect
Mustard	1	No Effect
MEK	(100 double rubs)	No Effect
Acetone	(2 minutes)	No Effect

Caring for your Daniel's Amish® furniture!

Humidity:

Excessively dry or damp air causes natural wood to expand and contract. Keep your home's humidity between 35 - 45% to prevent cracking and warping.

Ultraviolet rays:

Ultraviolet rays from direct sunlight or fluorescent light fixtures can cause chemical changes in the wood and finish. Move your table or draw the curtains.

Chemical cleaners:

Commercial waxes, polishes, or other cleaners can damage the finish of your new hardwood table. A damp cloth is all you need to use.

Heat:

Radiators, wood stoves, heating ducts – they warm your home, but dry out your solid wood table. Protect your investment by placing your table away from the heat.

Chemical Resistance Tests

Below are the results of subjecting our finish to the most common household chemicals:

Household Chemical	Hours	Result
Water	24	No Effect
Coffee	24	No Effect
Ketchup	24	No Effect
Vinegar	24	No Effect
Lemon Juice	24	No Effect
Ethanol/Water	24	No Effect
Grape Juice	24	No Effect
Orange Juice	24	No Effect
Olive Oil	24	No Effect
Detergent	24	No Effect
Mustard	1	No Effect
MEK	(100 double rubs)	No Effect
Acetone	(2 minutes)	No Effect

Caring for your Daniel's Amish® furniture!

Humidity:

Excessively dry or damp air causes natural wood to expand and contract. Keep your home's humidity between 35 - 45% to prevent cracking and warping.

Ultraviolet rays:

Ultraviolet rays from direct sunlight or fluorescent light fixtures can cause chemical changes in the wood and finish. Move your table or draw the curtains.

Chemical cleaners:

Commercial waxes, polishes, or other cleaners can damage the finish of your new hardwood table. A damp cloth is all you need to use.

Heat:

Radiators, wood stoves, heating ducts – they warm your home, but dry out your solid wood table. Protect your investment by placing your table away from the heat.

Chemical Resistance Tests

Below are the results of subjecting our finish to the most common household chemicals:

Household Chemical	Hours	Result
Water	24	No Effect
Coffee	24	No Effect
Ketchup	24	No Effect
Vinegar	24	No Effect
Lemon Juice	24	No Effect
Ethanol/Water	24	No Effect
Grape Juice	24	No Effect
Orange Juice	24	No Effect
Olive Oil	24	No Effect
Detergent	24	No Effect
Mustard	1	No Effect
MEK	(100 double rubs)	No Effect
Acetone	(2 minutes)	No Effect

Reclaimed Barnwood Furniture

To the casual observer, I am reclaimed barnwood. To the discerning eye and heart, I am a triumphant survivor. My past is one of weathering centuries of both nature's kindness and fury... and of having supported man's efforts to sustain himself and family. I may be born of a Bank barn in Pennsylvania or a Saxon barn in Ohio. I may be 70 years old or date back to the Civil War.

I am old, and I wear it proudly.

My unique essence has been preserved for all time by expert craftsmen who touch only that which needs to be handled, leaving the rest to tell its story. My oak planks are hand-selected, and de-nailed with care. My hues and knotholes are thoughtfully preserved, allowing me to share my unique and rich history with your family for generations to come.

What makes each piece unique:

Knotholes, coloring and accents are a natural result of weathering life outdoors and form a gorgeous patina unique to each piece.

Our reclaimed barnwood tables still bear the original saw blade markings giving them a rich hue and texture you can't find in today's hardwoods.

Sophisticated tooling finds and cleanly remove every hidden nail that can damage the wood before it becomes part of our furniture.

Caring for your Daniel's Amish® furniture!

Humidity:

Excessively dry or damp air causes natural wood to expand and contract. Keep your home's humidity between 35 - 45% to prevent cracking and warping.

Ultraviolet rays:

Ultraviolet rays from direct sunlight or fluorescent light fixtures can cause chemical changes in the wood and finish. Move your table or draw the curtains.

Chemical cleaners:

Commercial waxes, polishes, or other cleaners can damage the finish of your new hardwood table. A damp cloth is all you need to use.

Heat:

Radiators, wood stoves, heating ducts – they warm your home, but dry out your solid wood table. Protect your investment by placing your table away from the heat.

Chemical Resistance Tests

Below are the results of subjecting our finish to the most common household chemicals:

Household Chemical	Hours	Result
Water	24	No Effect
Coffee	24	No Effect
Ketchup	24	No Effect
Vinegar	24	No Effect
Lemon Juice	24	No Effect
Ethanol/Water	24	No Effect
Grape Juice	24	No Effect
Orange Juice	24	No Effect
Olive Oil	24	No Effect
Detergent	24	No Effect
Mustard	1	No Effect
MEK	(100 double rubs)	No Effect
Acetone	(2 minutes)	No Effect

Two-Tone is available in this style.

The two-tone option can be ordered with a stain finish on any wood type, but painted finishes will always be on Maple wood or Oak. For case pieces, doors, drawers, and tops are one finish and the frame is the other. There is no upcharge for two-tone stained items, but the higher priced wood species determines the cost. The price for Premium painted items is a 10% upcharge over the higher priced wood when two-tone is ordered, or 10% above the Maple or Oak price when all-paint is specified.
